Matías Granzella

Backend & AI Engineer | AI Lead at Ualá | Generative AI

linkedin.com/in/matias-federico-granzella | matiasgranzella.com | Buenos Aires, Argentina

SUMMARY

Backend & AI Engineer. As AI Lead at Ualá I take generative AI to production: LLM-based chatbots and assistants with RAG, evaluation and monitoring, focused on measurable business impact. I build complete systems, from frontend to backend and database, like my own products (Vesty, Gran Manager), with Next.js, React, Python/FastAPI and Go. 8+ years in software, data and artificial intelligence, with a background in Business Intelligence, Analytics Engineering and Data Platform Engineering. Independently, I build landing pages, custom systems, and AI integrations and chatbots.

EXPERIENCE

AI Lead 05/2026 - Present
Ualá Buenos Aires, Argentina

- Lead the development of Generative AI solutions for critical business processes and areas.

Senior AI Engineer 05/2024 - 06/2026
Ualá Buenos Aires, Argentina

- Built the customer-support chatbot with an LLM (OpenAI) and RAG that classifies queries by product and issue, reaching 81% accuracy.
- Built a conversational collections chatbot for the Credit area that resolves most cases autonomously and escalates critical cases to a human agent.
- Technologies: Python, OpenAI API, LangChain, LangGraph, RAG, Langfuse, PostgreSQL (pgvector), Google Cloud.

Senior Data Platform Engineer 02/2023 - 05/2024
Ualá Buenos Aires, Argentina

- Led a Google Cloud cost analysis with a Looker dashboard, saving 8.5% of the total cloud bill.
- Implemented Terraform and Terragrunt to version all Google Cloud infrastructure, with centralized CI/CD deployment.
- Built Hub Integrator, an event-driven (publisher/subscriber) solution that automates ETL processes on key events.
- Built an automatic feature generator that creates and stores Feature Store features from a query.
- Contributed to Chronos, the internal ETL, enabling production data marts available to every business area.

Senior Analytics Engineer 01/2022 - 01/2023
Ualá Buenos Aires, Argentina

- Led the implementation of dbt as the ETL tool for BI, defining methodologies and best practices.
- Migrated ETL processes from Qlik, Pentaho and Power BI to dbt; built macros, tests and Airflow DAGs on Google Cloud (BigQuery, Composer, Storage).
- Trained the team on dbt, Airflow and GitHub.

BI Analyst 11/2020 - 12/2021
Ualá Buenos Aires, Argentina

- Built end-to-end data solutions: requirements gathering, ETLs on Redshift (SQL) and Qlik, and dashboards in Qlik and Power BI.
- Projects: campaign conversion, mutual fund and MEP dollar launches, customer profitability and loan portfolio.

BI Analyst 04/2020 - 11/2020
Data IQ (Qlik Select Master Reseller) Buenos Aires, Argentina

- Built QlikSense and QlikView dashboards for clients such as OSDE and Loma Negra.

Junior BI Analyst 07/2019 - 03/2020
Data IQ (Qlik Select Master Reseller) Buenos Aires, Argentina

- Built end-to-end QlikSense and QlikView dashboards: requirements, data modeling, ETL and visualization.
- Clients: Farmalink, Western Union and Banco Ciudad. Onboarding buddy for 2 new analysts.

RPA Intern 08/2018 - 06/2019
IBM Buenos Aires, Argentina

- Built bots to automate processes across web, SAP and Excel for internal accounts in the region (WinAutomation, Automation Anywhere).

PROJECTS

Vesty (vestyapp.io) | Founder | 2026 - Present: App that brings Argentine investors' brokers, banks and exchanges into a single screen: real multi-currency (official, blue, CCL, MEP rates), returns net of fees, AI-powered statement import and a portfolio assistant. Full Stack build with React, Python (FastAPI) and Supabase (PostgreSQL).

Gran Manager (granmanager.com.ar) | Founder: Free web football manager game for the Big Five of Argentine football (formerly Millo Manager, River Plate only). Full Stack build with Next.js, React and Supabase.

GV Convertidores de Par (gvconvertidores.com.ar) | Freelance: Website for a torque converter repair shop in Buenos Aires: design and development.

3gen Padel Academy | Redesign (concept): Self-initiated redesign of a padel academy's website in Buenos Aires (matiasgranzella.github.io/3genpadel-redesign).

EDUCATION

Master's Degree in Management & Analytics 2022 - 2023
Universidad Torcuato Di Tella

Bachelor's Degree in Information Systems 2014 - 2019
Universidad de Buenos Aires

SKILLS

AI and LLMs: OpenAI API, LangChain, LangGraph, RAG, embeddings, pgvector, Langfuse, LLM evaluation and monitoring

Programming: Python, Go, SQL

Full Stack development: Next.js, React, FastAPI, REST APIs, Supabase, Vercel

Cloud: Google Cloud Platform: BigQuery, Cloud Run, Cloud SQL, Cloud Functions, Pub/Sub, Composer, Storage, Artifact Registry, IAM

Architecture: System design, REST APIs, event-driven architecture, load balancing

Data: dbt, Airflow, PostgreSQL, Redshift, data modeling, ETL/ELT

DevOps: Docker, Terraform, Terragrunt, CI/CD, GitHub Actions, Git

BI: Looker, Power BI, QlikSense, QlikView

LANGUAGES

Spanish (native), English (professional working proficiency, B2 First Certificate)

CERTIFICATIONS

Data Developer; Data Science; B2 First Certificate in English (FCE)
